

Table 9.
People Without Health Insurance Coverage by Selected Characteristics: 2007 and 2009

(Numbers in thousands, confidence intervals [C.I.] in thousands or percentage points as appropriate. People as of March of the following year. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see www.census.gov/apss/techdoc/cps/cpsmar10.pdf)

Characteristic	2007					2009					Change in uninsured ¹	
	Total	Uninsured				Total	Uninsured					
		Number	90 percent C.I. ² (±)	Percent	90 percent C.I. ² (±)		Number	90 percent C.I. ² (±)	Percent	90 percent C.I. ² (±)	Number	Percent
Total	299,106	45,657	526	15.3	0.2	304,280	50,674	549	16.7	0.2	*5,017	*1.4
Family Status

Worked full-time, year-round	105,244	15,692	346	14.9	0.3	95,808	14,589	335	15.2	0.3	*-1,104	0.3
Less than full-time, year-round	43,359	11,148	295	25.7	0.6	49,376	14,674	335	29.7	0.6	*3,526	*4.0
Did not work	39,310	9,981	282	25.4	0.6	45,443	13,222	321	29.1	0.6	*3,241	*3.7

* Statistically different from zero at the 90 percent confidence level.

¹ Details may not sum to totals because of rounding.

² A 90 percent confidence interval is a measure of an estimate's variability. The larger the confidence interval in relation to the size of the estimate, the less reliable the estimate. For more information, see "Standard Errors and Their Use" at www.census.gov/hhes/www/p60_238sa.pdf.

³ Federal surveys now give respondents the option of reporting more than one race. Therefore, two basic ways of defining a race group are possible. A group such as Asian may be defined as those who reported Asian and no other race (the race-alone or single-race concept) or as those who reported Asian regardless of whether they also reported another race (the race-alone-or-in-combination concept). This table shows data using the first approach (race alone). The use of the single-race population does not imply that it is the preferred method of presenting or analyzing data. The Census Bureau uses a variety of approaches. Information on people who reported more than one race, such as White and American Indian and Alaska Native or Asian and Black or African American, is available from Census 2000 through American FactFinder. About 2.6 percent of people reported more than one race in Census 2000. Data for American Indians and Alaska Natives, Native Hawaiians and Other Pacific Islanders, and those reporting two or more races are not shown separately.

⁴ The "Outside metropolitan statistical areas" category includes both micropolitan statistical areas and territory outside of metropolitan and micropolitan statistical areas. For more information, see "About Metropolitan and Micropolitan Statistical Areas" at www.census.gov/population/www/estimates/aboutmetro.html.
